Skills

-  PHP
-  Golang
-  Javascript
-  Docker
-  MySQL
-  Bootstrap

Educations

2016 - 2020

Pamulang University - Informatics Engineering

Projects

• Relocation Application

The Relocation Application is used internally by BRI to procure new telecommunications networks in work units, relocate and reposition, and dismantle telecommunications networks that are no longer used by work units.

• Integrated Network Monitoring Application

This network monitoring application is used to monitor the entire BRI internet network in Indonesia, starting from ATMs, KC, KK and others.

• IT Asset Application

The IT Asset application is used for managing / monitoring data sets online, such as their latest condition, the number of assets per category, information on the location of these assets and maintenance of borrowing sets such as laptops, printers and so on.

• Contract and Sales Invoice Application

This application is used to create sales contracts and invoices for products such as CO, CGK & PK. In this application there are 3 types of contracts namely LTC (Long Term Contract), STC (Short Term Contract) & Spot..

• Logistics Application (Warehouse)

This Logistics application is used for warehouse needs for incoming stock of goods and outgoing stock of goods from the head office to the work site. which is directly integrated with the Cash Bank application.

• Cash and Bank Application

This application is used in accounting to carry out or control transactions related to expenses and income such as cash & bank, so that it can estimate or inform bank and cash balances every day.

• General Ledger Application

The General Ledger (GL) application is an accounting application to record all journal transactions, ledgers, to produce financial reports such as trial balances, profit and loss balances, etc. automatically.
